

List of Edits - 7/11/26

- ☐ **New Transaction button:** Please also make available from Dashboard and Next Steps pages
- ☐ **Address:**
 - ☐ **Autopopulating:** This feature is great! But after I select the correct address, the field changes to just the street name. We need the full address to show. When I type out the full address, it stays there. I think it's just an issue with selecting it from the suggested list.
 - ☐ **Address fields:** I think we'll need individual fields for city, state, and zip. Not all on the same line as the street number and name. When an email is drafted the street number and name is needed at the beginning of the subject line of each email, not the whole address. I think the fields need to be separated so it can be used for email templates. With the autopopulate feature above, does the system save the individual field information (street number and address, city, state, and zip) individually?
- ☐ **Role:** When entering a new contact it's asking for a very specific role in that transaction. (Listing Agent, Buyer, etc.) My agents are sometimes Listing Agents, and sometimes Buyer's Agents. A Buyer from one transaction, might be a Seller in another transaction. This is common. Could we change the "Role" option to "Type of Contact" and change the options from "Listing Agent" and "Buyer's Agent" to "Agent" and change "Buyer" and "Seller" to "Buyer/Seller"? The input fields should be the same options for all types of agents, the input should have the same option for Buyers and Sellers. So I think this would work from an input standpoint.
- ☐ **Preferred Name:** I think this would need to be required so it works effectively with email templates? Right now it has a note that says it's optional.
- ☐ **Contact Name:** I think First and Last Name need to be separated so they can be used for email templates?
- ☐ **Contact Input Fields:** When entering a contact from the Contacts page, it has a limited number of fields and is missing key items needed for certain types of contacts. Please see list below for input fields for each type of contact.
- ☐ **Multiple Buyers or Sellers:** It's very rare, but on occasion there are more than 4 buyers or more than 4 Sellers. Can we take the limit of 4 away?
- ☐ **Primary Contact:** The Primary Contact that is linked to the transaction would be the first "Listing Agent" on a Listing file and the first "Buyer's Agent" on a Buyer file. Contact information should autopopulate. Maybe the Primary Contact is unnecessary and it's just as easy to enter the info in the agent field?
- ☐ **New Transaction In-progress:** When I'm in the process of entering a new transaction, and navigate away from the page, it deletes the New Transaction I am working on. Is there a way to keep the input available when clicking back and forth? Or does it need to be saved when navigating away? Opening a new transaction often takes an hour or more, and it's common to be pulled away, then have to go back to entering the information.

- ☐ **Escrow Assistant:** The Escrow Assistant is tied to the Escrow Officer. It should either be part of the Escrow Officer's contact information or autopopulate when a Escrow Officer is entered. The Escrow Assistant will be an individual contact for email purposes, but it's always the same Escrow Assistant for that specific Escrow Officer, so it shouldn't have to be input separately. Sometimes there are multiple escrow assistants for one escrow officer. Let's talk about how to handle this.

PARTIES INPUT - please see highlighted fields for changes that need to be made

☐ **Necessary contacts for each transaction are:**

- ☐ Listing Agent
- ☐ Listing Agent's TC
- ☐ Buyer's Agent
- ☐ Buyer's Agent's TC
- ☐ Escrow Officer / Escrow Assistant
- ☐ Seller
- ☐ Buyer

☐ **Optional contact that can be added with + button**

- ☐ Listing Agent 2
- ☐ Additional Listing Agent
- ☐ Listing Agent Assistant/Team Member - this option is missing on the Buyer file input
- ☐ Buyer's Agent 2
- ☐ Additional Buyer's Agent
- ☐ Buyer's Agent Assistant/Team Member
- ☐ Lender

(Notes: I think first and last name need to be separated to transfer to email templates?)

☐ **Agent input fields:**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ License number
- ☐ Email
- ☐ Phone number
- ☐ Brokerage name
- ☐ Brokerage license number
- ☐ Agent notes (only for the agent we're representing)

- ☐ **NEW IDEA:** Can we add a logo option to the Agent's contact information? If it's complicated, we can do it in a future project.

- ☐ **TC input fields**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Email
- ☐ Phone number - Please add this to TC contacts. I didn't used to have it, but I think it would be good to have the option.

- ☐ **Escrow Officer Input Fields**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Email
- ☐ Phone number
- ☐ Company Name
- ☐ Company Street Address
- ☐ City, State, Zip
- ☐ Assistant first name
- ☐ Assistant last name
- ☐ Assistant preferred name
- ☐ Assistant email

- ☐ **Seller input fields**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Email
- ☐ Phone number

- ☐ **Buyer input fields**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Email
- ☐ Phone number

- ☐ **Listing Agent Team Member/Assistant input fields (optional-added with plus button)**

- ☐ First name
- ☐ Last name

- ☐ Preferred name
- ☐ Email
- ☐ Phone number

☐ **Buyer's Agent Team Member/Assistant (optional - added with plus button)**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Email
- ☐ Phone number

☐ **Lender input fields**

- ☐ First name
- ☐ Last name
- ☐ Preferred name
- ☐ Company
- ☐ Note: NO email option for lender. This is a safety measure.

PROPERTY DETAILS INPUT

- ☐ **City, State, and Zip:** Please remove City, State, and Zip. They were entered earlier with the address.
- ☐ **Order of Inputs:** Please put Square Feet (home) before Lot Size
- ☐ **Propane:** Please add a yes or now option for "Propane". This is a new rule.
- ☐ **Yes/No Items:** If I accidentally click yes or no and am not sure of the correct answer, is there a way to de-select the option? Right now, it's only allowing me to change from yes or no, it's not allowing me to remove the answer. This doesn't happen often, but sometimes it's needed.

TIMELINE - I love, love, love how the timeline feature is starting out!

- ☐ **Completed or N/A:** Need an option to mark "Completed" or "N/A" in place of a date. This could potentially be a checkbox, or a fill in option in place of the date? What do you think would work best from a development perspective?
- ☐ **Order of Milestones:** Estimated COE should be below Verification of Property Condition and above Possession. (Note: I currently have the date input in the order they usually end up on the calendar. I may change the input screen to the order that they are found on the contract for more smooth input of information.)
- ☐ **Note on every timeline:** This note needs to be at the bottom of each timeline PDF - "Deadlines that fall on weekends or holidays move to the following business day"

- ☐ **Asterisk for bumped dates:** Is it possible to have an asterisk or something next to the dates that were moved due to a weekend or holiday? I do that manually with my current system. If there isn't an easy way to do it, I can try to go without it. I'm used to having it, but it may not be necessary.
- ☐ **PDF Attached to Email:** I love how the email timeline template inputs the timeline into the body of the email. This is something new that could be useful. It is possible to have the timeline PDF automatically attached to this email, instead of having to manually download it and upload it to the email?

REVIEW AND SAVE

- ☐ The system isn't allowing me to review and save the transaction. I think because there are missing fields. We need to be able to save a transaction, even if we're missing information.

NEXT STEPS PAGE

- ☐ Please remove "Contact" and "Docs" columns as those are not needed
- ☐ The Next Step section needs to be longer as that the main piece of information on this page
- ☐ Please make the Next Step Date a separate column from the Next Step
- ☐ Can you please add a feature where someone can click on any one of the headings, such as "next step date" and have the list sort by that column?
- ☐ The default sorting should be by the Next Step Date starting with the earliest date

STORED DOCUMENTS

- ☐ How do I add documents to the folders under "Stored Documents"
