

OVERVIEW TAB

- Need parties and timeline visible on Overview tab. And Property and Transaction Details viewable - maybe via dropdown? In a concise format of course, not like input fields.
- How can we make next step be editable without having to click “edit” and “save”? Trying to reduce clicks.

TASKS TAB

- Needs status and time stamped notes fields like with checklist
- If Task is sending an email, linked to email with parties, subject, and template auto-populating

NEW PROJECT

The order of inputs is slightly different for new Listings and new Buyer files because the workflow is slightly different.

Below are edits needed for NEW LISTING input:

For new listing input, the Transaction Details, Timeline, and Buyer’s Agent’s contact information will not be input at this stage as they don’t exist yet. These pieces of information will be input once a contract is accepted.

For listing input, the Listing Agent and Team will be before the Buyer’s Agent.

Please put project Input in following order for now for Listings:

- General
- Parties
- Property Details
- Listing Details

Once a contract is accepted, the following sections needs to be completed

- Transaction Details
- Timeline - Printable PDF w/option to email

General:

- Please put address in this location as it’s the main piece of information/name of project

Parties:

- Instead of “Assistant” please use “Assistant/Team Member”

- Each party separate and collapsible
- We need a Preferred Name field for each contact. Not sure the best term to use for this?
- Add "Lender" to parties, but only name and company. NO email. This party will only be needed once a contract is accepted.
- Escrow Assistant and their email will auto-populate once an Escrow Officer is input. These assistant fields are part of the Escrow Officer's contact information.

Property Details:

- Please name this section "Property Details" instead of "Property Information"
- Please add "Mobile/Manufactured Home" and "Commercial" to Property Type options

Listing Details:

- Please include "Seller name on Listing Agreement" field*
- Please include "Seller name on Prelim" field*
- *I may move these to the Seller contact information
- A step on the task checklist is to see if these fields match. However, I don't think this can be automated, as they may be close enough to consider the same, but not an exact match. So a person would need to evaluate the names to see if they qualify as the same or not.

Transaction Details:

- RPA Seller and Prelim Seller. Not sure the best place for this yet. RPA Seller would be natural to put on Transaction Details. But that information would need to be readily available when entering Prelim Seller. Maybe that can be a task under the disclosure checklist. Once everything else is done and I walk through the process, I'll have a better idea of where to put this information.
- The DocuSign "yes/no" option is not needed in this section. It is only necessary in this section for Buyer files.

Timeline:

- Smaller, more concise, maybe in one row because it's usually chronological.
- Needs place to enter number of days/business days
- Needs asterisk when applicable
- Free form type option, not just date?
- Needs to auto-populate to Overview page, Calendar, and printable PDF (Timeline tab)
 - Printable PDF, and timeline on overview page, need to be in chronological order
 - Have email option connected to templates and who it goes to
- Need an option to add a custom timeline field/date
