

List of Edits - 7/18/26

- ☐ **Role:** Thank you for combining Listing Agent and Buyer's Agent into one as "Agent".
 - ☐ Please also combine "Buyer" and "Seller" into one category of "Buyer/Seller".
 - ☐ Please combine "Listing Agent Team Member/Assistant" and "Buyer's Agent Team Member/Assistant" into one field "Agent Team Member/Assistant"

***Note:** I realize this wasn't clear in my last set of edits because I still had them listed separately when I listed the input fields. Sorry about that!*

- ☐ **Agent input fields order:** Thank you for adding First Name and Last Name separately.
 - ☐ Please rearrange so the "Brokerage Name" and "Brokerage license number" are next to each other. (Maybe by putting "Type of Contact" and "Status" next to each other, and the agent's "license number" next to their "preferred name"??)
- ☐ **Agent Logo:** Not an edit, just a note to say thank you for adding this extra feature!
- ☐ **TC input fields:** Not an edit, just a thank you for adding the notes section to contacts other than the agent! I hadn't thought of doing that, but it will be very useful.
- ☐ **New Transaction - incomplete fields:** We need a way to differentiate blank input fields from completed ones, so it's easy to see what's missing. At some point, almost all items need to be completed or marked "N/A". Maybe they can be highlighted or outlined in red or some sort of other differentiation?

TIMELINE

- ☐ **N/A, etc:** Thank you for adding the N/A and Completed options. Please add option for "Waived" to all 7 Contingency Removal line items
- ☐ **Some dates aren't bumped:** The Contract Date and Acceptance date are fixed dates and can be on weekends or holidays. Deadlines and close of escrow dates can only land on business days.
- ☐ **Asterisk for bumped dates:** Having an asterisk or something next to the dates that were moved due to a weekend or holiday. It sounds like there isn't an easy way to do this, I can try to go without it. I'm used to having it, but it may not be necessary.
- ☐ **Back to Timeline:** When looking at the "Print PDF" page on the timeline, it has an option to click "Back to Transaction" but this takes me back to the overview of the transaction. We need an option to go back to the timeline tab, please.
- ☐ **Timeline tab on existing transaction:** This tab should be different from the input screen. It should show a clean and neat list of the timeline. Possibly the PDF layout, or something similar. Then an edit button can bring it back to the input screen.

REVIEW AND SAVE

- ☐ **Require fields to save:** It makes sense to need the Address, Primary Contact, Next Step, and Next Step Date to save a transaction. This works perfectly. However, on the Buyer side it's still requiring certain dates from the timeline (Contract Date, Acceptance Date, Preapproval, Loan CR, COE). **These don't make sense to be required to save a transaction as they are not always immediately available.** The Preapproval and Loan CR may not apply to the transaction. It's very common that I'm opening a transaction but need confirmation on the Acceptance Date and need to wait on a response from the agent. I need to move forward with opening a new transaction without having a confirmed Acceptance date. Without an Acceptance Date, I won't know the COE date. The Contract Date shouldn't be a required field upfront either. If it breaks other parts of the system, I'm sure we can find a workable solution. **I have some ideas, but would like to have a clearer understanding of the problem so we can find the best solution. Let's talk about this. :)**
- ☐ **Save/Create Transaction still not always working:** I was able to create a few sample transactions. Then I tried to enter another one and it won't let me save it. The mode shows 12/12 completed, but it still won't let me save. It doesn't list anything that's missing that is required.
- ☐ **Formatting:**
 - ☐ Dates formatted as "MM/DD/YYYY" instead of "YYYY-MM-DD"
 - ☐ Purchase Price formatted as a dollar amount

PARTIES

- ☐ **Listing Agent Email on Buyer Files:** When opening a new Buyer file, I am entering a "new contact" for the Listing Agent. It is not allowing me to save the contact without entering the email. While the email is a required field, I may not have it immediately. I may need to save what I have, then add the email address later. (Note: In general, as I enter information for a new transaction, the information sometimes comes in random order. I need to be able to enter the information as I find it, then add the rest in later.
- ☐ **Contacts collapsed:** Please have contacts start collapsed. I will open them as I'm ready to fill in information.

PROPERTY DETAILS

- ☐ **SPBB%:** Needs to allow special characters. I'm not able to add a "." or a "%" to create 2.5%

TRANSACTION DETAILS

- ☐ **Formatting:**
 - ☐ Please format Purchase Price as \$ amount
 - ☐ Square Feet and Lot size need to allow for numbers and letters
