

Questions, comments, and clarifications - 6/21/26

Timeline tab

- Will the timeline PDF automatically be attached to the email template when using the “Email Timeline” button? Or does it need to be downloaded and uploaded as a separate step?
- There are two separate timeline emails - one that goes to the escrow officer and agents, and other that goes to the Buyer or Seller. Can we have two buttons on the timeline tab, one for each template?

Emails

- Can email drafts be saved?
- Can email drafts be scheduled to send at a later time?
- Can document(s) in a folder be emailed directly from there, or do they need to be downloaded, then uploaded to an email?
- How do we attach a document to an email?

Documents

- Can I save documents and folders of documents that are not tied to a specific transaction? I think this is possible with the “Documents” tab on the left hand column of the home screen, but I’m not sure.
- I need to be able to create folders of documents and share links to those folders with third parties. This is needed when I send signed disclosures to another agent and their TC, and when I send the client a copy of the file at the end of the transaction. These shared folders are temporary and do not need to be stored for more than 3mos.

Tasks

- When a step on the task list is to send a specific email, can that step be linked directly to that email template? (Similar to the “Email Timeline” button linking directly to the timeline email template)
- On the task list, I need a way to link a certain task to a document and possibly a video. These documents are typically detailed instructions for that specific task.

Checklist

- Need to be able to type time stamped notes next to each document name listed on the document checklist. I think we talked about this, but I can’t find it on the prototype. Is it going to be added in the next phase?
